Welcome to the *Psychoanalytic Fair!*

In 1909, Freud visited the United States via New York for the first time, and never returned; yet a legacy remained. By his death in 1939, psychoanalysis was firmly rooted in America as a new treatment method, and *The New York Times* obituary named Freud, "the most effective disturber of complacency in our time." One hundred years later, the proliferation and advancement of psychoanalytic theory continues, countless psychoanalytic institutes abound, and who should get to train as a psychoanalyst remains a divisive issue. Psychoanalysis appears to still be a significant force in the world despite threats that its demise is near.

Today we invite you to reflect on whether the realities of our modern lives require a renewed dedication to this orientation. As Anne-Marie Smith inspires in *Julia Kristeva: Speaking the Unspeakable*, given today's fast-paced world, "there is no time and space for subjectivity to define itself, that is, to seek expression, encounter obstacles, imagine ways round them, to resign itself to the inevitable and revolt against the impossible" (p.56). Psychoanalysis brings depth and nuance to our vision, allows us to imagine beyond the obvious surface of things, and brings our interiorities to the fore. Psychoanalysis may be the last place of respite for us to dwell. We look forward to our panelists' insights on the relevance of psychoanalysis in the 21st century.

As an early career psychologist and psychology student, we both empathize with the task of finding one's calling in the vast field of mental health and navigating the potentially confusing path to an education or career in psychoanalysis. We created this fair not only to disseminate information on the various types of training available in the New York City metro area, but also to inspire prospective candidates to enter the field and promote psychoanalytic thought. The transmission of psychoanalytic wisdom to the next generation is of particular interest. We hope that the fair will serve as a valuable forum to build bridges of communication between current and future psychoanalysts to both preserve and innovate the field.

As you walk through the halls of Teachers College, Columbia University, remember that you are a part of history: never before have the psychoanalytic institutes gathered together under the same roof in such an "ecumenical" spirit. Since its conception, psychoanalysis has had a rich history of debate and difference. Today we honor this *diversity in unity*, as we meet quite literally on common ground. The *Psychoanalytic Fair*, like psychoanalysis itself, is a quintessential New York story!

Sincerely,

Aurélie + Marie

## PANELISTS

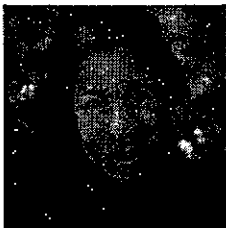

**LEWIS ARON, Ph.D.** is the Director of the New York University, Postdoctoral Program in Psychotherapy and Psychoanalysis. He was the founding president of the International Association for Relational Psychoanalysis and Psychotherapy (IARPP), and was formerly President of the Division of Psychoanalysis (39) of the American Psychological Association. Dr. Aron was the founding President of the Division of Psychologist-Psychoanalysts of the New York State Psychological Association (NYSPA). Dr. Aron is the author of numerous publications and his recent book (co-author Karen Starr) *A Psychotherapy for the People: Toward a*

*Progressive Psychoanalysis* leads the way for a return to Freud's progressive vision of psychoanalysis, broadly and flexibly, revitalized for a new era.

**RICHARD REICHBART, Ph.D.** is President-Elect and Fellow of the Institute for Psychoanalytic Training & Research (IPTAR), and Chair of the IPTAR Diversity Committee. He is training and supervising analyst at the Center for Psychotherapy & Psychoanalysis of New Jersey (CPPNJ), a Board member of the China American Psychoanalytic Alliance (CAPA), and past president of the New Jersey Psychoanalytic Society. Dr. Reichbart is the author of numerous papers including, "*On Men Crying: Lear's Agony*" in the Journal of the American Psychoanalytic Association. He writes on the revolution taking place within psychoanalysis, arising from the area of gender and sexuality, one that has been developing for years and has recently burst forth more fully. He is also the organizer of conferences on diversity such as

*Latin American Contributions to Psychoanalysis* and *Black Psychoanalysts Speak*.

**SHERRY SALMAN, Ph.D.** has a doctorate in neuropsychology and has practiced as a Jungian psychoanalyst and teacher for the past 25 years. A graduate of the C.G. Jung Institute, Dr. Salman was a founding member and the first President of the Jungian Psychoanalytic Association, a professional organization and clinical training program which works to advance and promote the study of analytical psychology, where she now serves on the faculty and is Dean of Students. Dr. Salman has been associate editor for the Journal of Analytical Psychology, and is a research consultant for the Archive for Research in Archetypal Symbolism. Her recent publications include "New Directions Home: African

Oracles and Analytic Attitudes", "The Creative Psyche" in the Cambridge Companion to Jung, and her recent book *Dreams of Totality: Where We Are When There's Nothing at the Center*. Dreams of Totality explores psychological and cultural images of wholeness from ancient civilizations through today and speaks to the contemporary imagination both challenged and unmoored by today's global realities.

**FRANK SUMMERS, Ph.D.** is a Training and Supervising Analyst at the Chicago Institute for Psychoanalysis, Dr. Summers is also the President of the American Psychological Association's Division of Psychoanalysis, a Diplomat in Clinical Psychology of the American Board of Professional Psychology, a Professor of Clinical Psychiatry and the Behavioral Sciences at Feinberg School of Medicine, Northwestern University. A member of the editorial board of Psychoanalytic Psychology, and an associate editor of Psychoanalytic Dialogues, Dr. Summer is also the author of numerous publications. His recent book *The Psychoanalytic Vision: The Experiencing Subject, Transcendence, and the Therapeutic Process*, is based on a fresh approach to psychoanalytic therapy and its place in contemporary culture based on

phenomenological philosophy. Dr. Summers has spoken on "Psychoanalysis in the Age of Nikeism" a commentary on our current culture of "just doing it" as an impatience to act without attending to Being, and why psychoanalysis is more critical now than ever.

**JAMIESON WEBSTER, Ph.D.** is a psychoanalyst in private practice in New York City and teacher at Eugene Lang College at the New School and clinical supervisor at the City University of New York. Her work has an interdisciplinary focus on feminine sexuality, philosophy, and aesthetics. Dr. Webster founded Das Unbehagen a place for early career professionals to talk about the contemporary state of psychoanalytic formation and training. Her latest book, is *Stay, Illusion!* (Pantheon, 2013) written with Simon Critchley. She is also the author of The Life and Death of Psychoanalysis: On Unconscious Desire and Its Sublimation and has written for *Apology*, *Cabinet*, *The New York Times*, and many psychoanalytic publications. She writes: From its peculiar birth in Freud's self-analysis to its current state of deep crisis, psychoanalysis has always been a practice that questions its own existence. Like the patients that risk themselves in this act - it is somehow upon this threatened ground that the very life of psychoanalysis depends. Perhaps psychoanalysis must always remain in a precarious, indeed ghostly, position at the limit of life and death?

## MODERATOR

**MATTHEW BLANCHARD, M.A.** is a former newspaper reporter and a second-year PhD student in Clinical Psychology at Teachers College, Columbia University. He serves as the department's Adjunct Faculty Liaison, is an academic advisor to MA students, and is co-coordinator of the Concentration in Psychotherapy and Psychoanalysis. He ponders the mysteries of transference every weekday as a therapist at the Dean Hope Center for Educational and Psychological Services.

## SPEAKERS

**AURÉLIE ATHAN, Ph.D.** is a lecturer and an administrator of the Masters Program in the Department of Clinical Psychology at Teachers College. Her scholarly interests center on women's development across the lifespan with a focus on motherhood and her clinical orientation is informed by analytical psychology with an interest in the creative expression of the human psyche in the arts and psychotherapy. The *Psychoanalytic Fair* was envisioned to educate students and beyond about this potential professional path and to welcome the rich diversity of psychoanalytic perspectives in unity.

**MARIE C. HANSEN, M.A.** is a student in the Department of Clinical Psychology, Teachers College, Columbia University and the president of *Cathexis*, a student organization devoted to promoting psychoanalytic thought across academic disciplines. She is a member of the Hearing Voices Movement in New York City and has written on psychodynamic approaches to premenstrual syndrome and postpartum hallucinations. By co-creating the *Psychoanalytic Fair*, Marie hopes to bring together the different psychoanalytic institutes and inspire the next generation of psychoanalysts.

**MARIANNE TRAMELLI, Ed.D. Candidate** brings close to 30 years in the career services profession, of which, 13+ years at Teachers College as the Director of TC Career Services. Marianne has served as the President of both the local and regional career services associations, MNYCCPOA and EACE and is often asked to provide her expertise through leading professional development committees and strategic planning initiatives. Marianne has been the recipient of many awards for her service to this field including the EACE Distinguished Service Award, EACE Outstanding Service Award and several Presidential Citations. Marianne has a Master of Arts in Counseling and Personnel Psychology (Fairleigh Dickinson), a Master of Education in Higher and Postsecondary Education (TC) and is currently an Ed.D. Candidate in Adult Learning and Leadership (TC). Marianne has brought an expertise to TCCS that coupled with dynamic staff has resulted in the office becoming a significant presence in the life of Teachers College.

Our psychoanalytic training program is a four-year comprehensive post-Master's graduate program entailing didactic courses, patient work, and individual and case conference supervision. It is one of the only accredited post-graduate training programs in New York City to be associated with an Office of Mental Health licensed counseling center, and is unique for its emphasis on the relationship between psychoanalysis and spirituality. It is approved as a licensure-qualifying program by the N.Y. State Education Department (NYSED) is accredited by the American Board for the Accreditation of Psychoanalysis (ABAP), the accrediting board for the National Association for the Advancement of Psychoanalysis (NAAP), and by the American Association of Pastoral Counselors (AAPC). The Residency program takes four years to complete. The weekly time commitment is minimally equivalent to two and a half days at the Institute, with additional clinical work and reading time; part-time and non-matriculation schedules can be arranged. In addition to undergoing personal psychoanalytic therapy at least two days a week during training, residents in our psychoanalytic program spend a minimum of 1,000 hours working with clients in individual psychotherapy, receive over 250 hours of multidisciplinary supervision, and accumulate over 100 credits of course work that provides academic support for the clinical work.

Modern Psychoanalysis rests on the theoretical framework of Freud and is the name given to it by Hyman Spotnitz, who developed a range of techniques to work with preoedipal disorders previously thought untreatable through the psychoanalytic method. Our training is exacting, learning psychoanalysis is first and foremost a task of learning about oneself so that one can use his or her intellectual understanding of, and the feelings generated through, the transference and countertransference matrix to work with a wide range of mental disorders. Both experiential process and the more traditional teaching methods are used to promote learning.

CPPNJ is a diverse, contemporary psychoanalytic training institute centered in New Jersey with over 100 faculty members representing a full range of psychoanalytic perspectives and theoretical approaches. Through its classes, supervision, and public programs, CPPNJ advocates that contemporary psychoanalysis remains a vital and effective mental health treatment. We offer many opportunities to deepen the training experience with formal and informal workshops, seminars, conferences, and social gatherings. The Candidates' Organization offers peer group and referral opportunities. Additionally, candidates may receive referrals through our Psychotherapy Center. In addition to training in individual psychoanalysis, CPPNJ offers training in couples therapy through our Couples Division, the New Jersey Couples Therapy Training Program. Applicants to the couples training program do not need prior analytic training and licensed clinicians are invited to take any couples course without matriculating in the program. Our nurturing and supportive community of candidates and faculty will become your peers and colleagues, now and in the future:

**Admission Contact:** Michael Connolly, MPA, NCPsyA; 646-479-2573;

[michael.connolly@harlemfamilyinstitute.org](mailto:michael.connolly@harlemfamilyinstitute.org)

The Harlem Family Institute is a multicultural psychoanalytic training institute that provides two community services. Firstly, for children, their parents and adults in need, a deeply committed program offering free or affordable, long-term therapy provided in neighborhood schools and community centers, especially in underserved areas. Secondly, for aspiring psychoanalysts from diverse backgrounds, a dynamic training institute offering a foundation for a career as a certified psychoanalyst. Few long-term psychotherapeutic and emotional-support programs exist for struggling and at-risk youth and their parents in New York's schools in underserved neighborhoods. The Institute takes psychoanalytic work out into the community where it gives youngsters a safe space to voice their feelings, learn to use their strengths to manage the challenges they face each day, and discover new ways to relate to the world.

We are the longest running feminist, relational psychoanalytic training program in the country, over 30 years. We specialize in eating problems and body dysmorphia for post graduate therapist. In all our work we include the impact of political, economic and ideological contexts on the psyche/soma. We explore the relationship of cultural and consumer symbols on the psyche/soma and interpersonal relationships. We run lectures and workshops for the public as well as for professionals covering a variety of topics in the field, as well as an annual Speak Out for the public suffering from eating and body image problems. The Institute has created what has now become an International Organization called Endangered Bodies. It is devoted to exposing and combating the pressure on women's psyche to have and be the "perfect body/self." Currently, we have chapters in New York City, London, Sydney, Buenos Aires, Sao Paulo, Ireland, Germany and Mexico.

Psychoanalytic Education

## Accreditation Council for Psychoanalytic Education, Inc.

The Accreditation Council for Psychoanalytic Education, Inc. is an autonomous accrediting body that was established in 2001 as a Delaware (USA) not-for-profit corporation to implement the Standards of Psychoanalytic Education that the Psychoanalytic Consortium had delineated.

The ACPEinc has a twofold mission: to protect the public by evaluating and accrediting psychoanalytic training programs in the United States and to promote excellence in psychoanalytic education. By its accrediting function the ACPEinc aims to assure that training institutions educate practitioners of psychoanalysis to appropriate standards.

It seems reasonable to believe that an institute that adheres to the core Standards of Psychoanalytic Education will welcome the opportunity to have the high quality of its program endorsed by an independent agency. The ACPEinc is that agency.

The self-study exercise that is the essential element of the application allows an institute to review for itself the extent to which it meets its own stated objectives. The site visit and reporting process afford an institute opportunities to view itself in the eyes of colleagues from other parts of the country. This provides affirmation and the basis for continuing self-improvement.

ACPEinc accreditation immediately provides university-affiliated programs status equal to that of other advanced programs in graduate schools, which customarily require each such program to gain accreditation by its relevant independent review agency. ACPEinc accreditation assures prospective candidates that an institute that they may be considering provides appropriate training in the core elements of psychoanalytic theory and practice and an introduction to research in these areas. Eventually, we anticipate, graduation from an ACPEinc accredited institute will confer eligibility to sit for national certification examinations.

The ACPEinc is aware that psychoanalysis is a rich and diverse profession and that its Standards may be implemented in various ways. We expect only that each institute will adhere to the core Standards and that it will implement its own standards and values in a coherent and consistent fashion.

The ACPEinc accredits only established institutes, but we will offer support and guidance to the founders of a new program from the earliest phase of their work, to help assure that their institute will, in due course, meet ACPEinc standards.

The American Board for Accreditation in Psychoanalysis, Inc. accredits institutes granting certificates or diplomas in psychoanalysis. It was incorporated in 1996 to inherit the accreditation process formerly mediated by the National Association for the Advancement of Psychoanalysis who had been accrediting training programs for decades. ABAP is a recognized member of the Association of Specialized and Professional Accreditors so sits at a national table with accreditors from such fields as Psychology, Marriage and Family Therapy, Counseling Education, etc.

Accreditation is a unique time-tested feature of American psychoanalytic education. Its purposes are to maintain and improve the quality of educational performance, to safeguard the public from educational programs of unacceptable quality and from inadequate educational practices thus ensuring integrity in psychoanalytic education and training. These goals are achieved through the voluntary association of psychoanalytic educators and other professional persons. This association provides careful scrutiny of educational practices and imposes sanctions; yet it operates in ways consistent with traditional autonomy and freedom of individual schools.

ABAP's task monitors the accrediting process and insures that it is conducted effectively and responsibly in the interests of the students who are being educated and of the general public. ABAP's governance reflects traditional autonomy and academic freedom. This autonomy requires that the psychoanalytic institutions collectively exercise substantial control over the accrediting process, as is consistent with its self-regulatory character. ABAP's governance ensures the involvement and acceptance of responsibility for accreditation and its coordination by psychoanalytic institutions as represented by responsible academic officials.

Full and equitable participation and involvement of psychoanalytic institutions and representatives of the public provide unity and integrity to the ABAP, Inc.'s structure. This results in an effective forum for psychoanalytic institutions to deal with their mutual and separate concerns in psychoanalytic accreditation and to formulate, debate, forward and implement policy positions.

The members of APsaA envision a world in which psychoanalytic knowledge advances human potential and relieves suffering.

DIVISION 39

AMERICAN PSYCHOLOGICAL ASSOCIATION

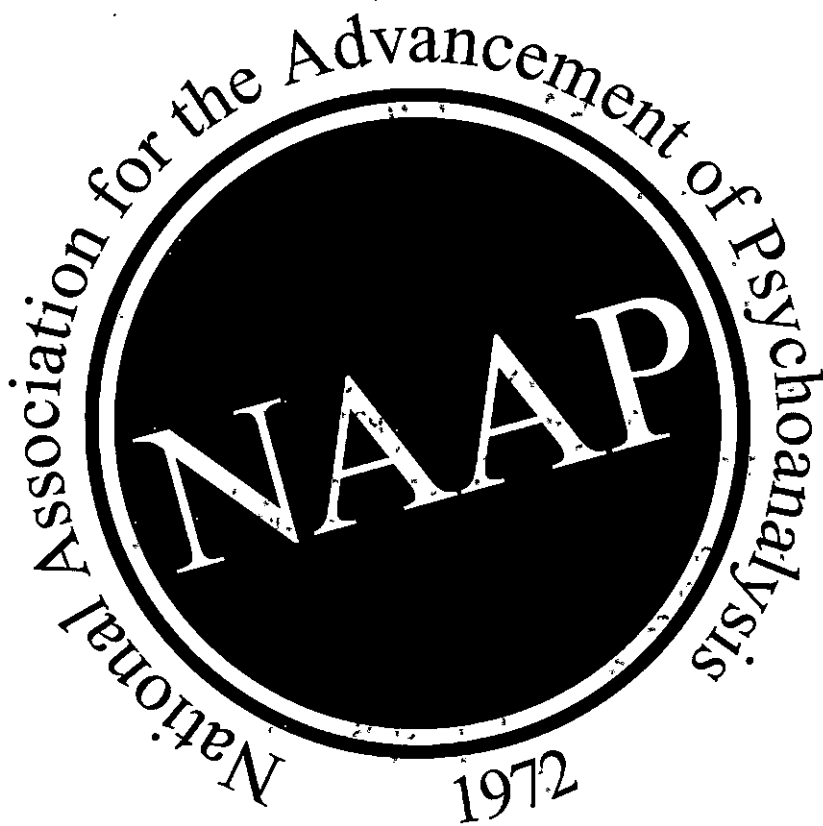

## Division 39

Founded in 1979, the Division of Psychoanalysis of the APA is the 39th Division of APA. With nearly 3000 doctoral level psychologists, graduate students and allied mental health professionals, it is one of the largest associations of psychoanalytic professionals and scholars in the world. The Division of Psychoanalysis represents the full diversity and vibrancy of contemporary psychoanalysis. The Division has approximately 30 Local Chapters in cities across the United States and Canada, and eight Sections representing members' broad interest in clinical practice, human development, women and gender issues, research, family therapy and social justice. The Division is also devoted to the needs of early career professionals and offers many programs and benefits to ensure the vitality and voice of newer professionals within the Division, and the larger organization. Finally, we have seven seats on the APA's Council of Representatives, giving us a strong voice in matters of importance to members.

## Activities of the Division

Our twice-yearly meetings sponsor symposia and workshops, as well as offering continuing education and highlighting the cutting edge of current psychoanalytic thinking. This includes the summer meeting as part of the larger APA national convention and the Division's annual Spring Meeting. These meetings are also valuable opportunities to network with colleagues.

The Division has stimulated the development of interdisciplinary local chapters and training institutes. Interested psychologists are encouraged to participate in both local and national levels of the Division's activities.

**OUR HISTORY:** The Division of Psychoanalysis of the New York State Psychological Association was founded in 2004 as the first such division within a state psychological association. The mission of the division is to enhance the understanding and advancement of psychoanalytic theories, treatment approaches, research, legislative, political, and other professional concerns. The division provides a supportive, collegial statewide community, providing a voice for psychoanalysis within the New York State Psychology community. The Division fosters inter-institute collaboration and educational programs that explore therapeutic, scholarly, educational, research, public service, social justice, and diversity issues from psychoanalytic perspectives.

**OUR MISSION:** Our Division provides a dynamic, supportive home for psychologists and doctoral and undergraduate students who have an interest in psychoanalysis. The Psychoanalytic Division has had a growing membership of 400+ members from analytic training programs in New York State, as well as students and others interested in the value of psychoanalytic and psychodynamic approaches and thinking, making us one of the largest psychoanalytic groups.

**HOW YOU CAN BENEFIT:** As a Student Member, you will receive emails about current issues for psychoanalysts and psychologists practicing psychodynamic therapy. We offer clinical and research student awards, grants to attend NYSPA's annual convention, clinical consultation groups, mentoring, a yearly conference, and evening soirees that you are welcome to attend. We have students on our Board who help shape our policies, goals, and agenda. As a student member, you will have an opportunity to get to know and receive mentoring from psychologists specializing in this kind of therapy. You will be in the know. Become a NYSPA student member for \$35 and then join the Psychoanalytic Division for free.

**OUR 2014 PROGRAMS WILL INCLUDE:**

- Conference on Integrating Psychoanalysis & Other Clinical Modalities
- Evening Clinical Soirees with Major Psychoanalysts
- Co-Sponsorship of the February 8th Psychoanalytic Fair at Columbia University
- Co-Sponsorship of the APA's Division 39 Convention in New York City in April
- Psychoanalytic Reading Group(s) to be formed based on interests, such as neuropsychology, and trauma, child, addictions, & evidence-based treatment
- Discussion and Advocacy of Challenging Practice Issues that Psychologists are Facing with Changes in Health Care Delivery and Reimbursement Systems
- Collaboration with NYSPA Leadership on Insurance, Practice, Training & Legislative Issues
- Peer Consultation Groups
- Publication of PsychMatters, an E-Newsletter for the Public

Psi Chi is the **International Honor Society in Psychology**, founded in 1929 with two primary purposes:

1. to encourage, stimulate, and maintain excellence in scholarship, and
2. to advance the science of psychology.

Membership is open to undergraduate and graduate students who are majoring in psychology, and who meet the minimum qualifications. Psi Chi is a member of the Association of College Honor Societies and is an affiliate of the American Psychological Association (APA) and the Association for Psychological Science (APS). Psi Chi's sister honor society is Psi Beta, the national honor society in psychology for community and junior colleges.

**Students become members by joining the chapter at the school where they are enrolled.** Psi Chi chapters are operated by student officers and faculty advisors. Together they select and induct the members and carry out the goals of the Society. **Over 1,100 Psi Chi chapters are located around the globe.**

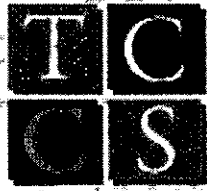

All chapters register their inductees at the Central Office. The total number of memberships registered at the Central Office is now **over 600,000 lifetime members**. The Central Office is located in Chattanooga, Tennessee. A Board of Directors, composed of psychologists who are Psi Chi members and are elected by the chapters, guides the affairs of the organization and sets policy with the approval of the chapters.

Membership in Psi Chi is open to students who are majoring or minoring in psychology, and attend an institution where a chapter is located. Qualified candidates include those of any age, sex, sexual orientation, race, handicap or disability, color, religion, national and ethnic origin, and who meet the minimum qualifications.

**The Psi Chi Society membership fee is \$55.** This one-time fee pays for lifetime Psi Chi membership, a certificate of membership, and a membership card. There are no annual Central Office dues, but there may be local chapter dues. Please contact the faculty advisor at your chapter for more information.

### **THE GATEWAY... TO THE MENTAL HEALTH PROFESSIONS**

Students within the MA Program are given an unprecedented opportunity to experience the demands of a graduate-level education in Clinical Psychology while also exploring the multiple avenues available in the ever-growing mental health field beyond. Our mission is to provide students with a platform to clarify their interests and then direct themselves toward their next professional goals. The field of applied psychology is vast. The MA Program exposes students to diverse perspectives and populations, and supports them with intensive academic advisement, so that they may discover the best fit for their unique abilities. Graduates of the MA Program leave prepared to confidently pursue higher education or employment in any number of mental health related professions with the understanding that their degree can be effective in many settings.

The curriculum is a well-rounded program designed with numerous course offerings within these three categories:

- I. **Foundations:** Includes the basics of diagnosis and psychopathology for children and adults, as well as an introduction to the professional responsibilities of clinical psychologists and the standard research methodologies unique to our field. These *core* courses are foundational and highly recommended.
- II. **Applications & Populations:** Includes the theoretical *application* of various modalities of psychotherapy and testing to the assessment and treatment of psychopathology. This category also includes courses focused on the unique challenges and needs of special *populations*.
- III. **Specialties & Innovations:** Includes a mixture of coursework best described as providing either a *specialty* in a topical area of interest (e.g., Human Intimacy) or *innovations* in research and practice as taught by expert or cutting-edge scholars and practitioners. Each semester visiting lecturers come to teach a rotating number of Special Topics courses that represent their unique expertise in the field.

There are also **SEVEN areas of concentration**: Research Methods; Child & Family; Community Psychology; Global Mental Health & Trauma; Sexuality, Women, & Gender; Psychotherapy & Psychoanalytic Perspectives.

---

**Concentration in Psychotherapy & Psychoanalytic Perspectives:** This area of focus prepares students to deepen their understanding of the various psychotherapeutic perspectives and their styles of intervention. Students will sample theories of contemporary and classical therapeutic orientations so they may one-day train to become psychotherapists or psychoanalysts. Upon graduation, students may pursue this training within doctoral programs (PsyD programs focus on clinical practice), psychoanalytic institutes (*many now have licensure tracks* and welcome MA level applicants), or even an LMHP Licensure track Masters (Licensed Mental Health Practitioner). This concentration is for those who wish to one-day focus specifically on direct patient contact and the treatment of individuals through psychotherapy and counseling theories and techniques.

---

\*\*\*The MA Program is also available for non-matriculated students to benefit from these diverse course offerings. Coursework may be used to round out training already received or to supplement classes not offered in their host institution. ## PSYCHOANALYTIC FAIR LOGO

The *Psychoanalytic Fair* logo was designed by Helen Zervou. She is an Art Student in the Athens School of Fine Arts. The logo was inspired by the Persian story of the *Conference of the Birds* (recently retold in the children's book of the same name by Peter Sis). In the poem, all the birds of the world each with a particular talent and flaw, gather to decide who is to be their king. The hoopoe bird suggests that they should find the legendary *Simorgh*, a mythical bird much like the phoenix. After a long

journey, only thirty birds survive to finally reach the dwelling place of the great *Simorgh*. At last, they come to meet their king, only to realize that it is their own collective image that they see reflected from the surface of a lake: together, they make up the one. "*Si Morgh*" means "thirty birds" in Persian.

## SPECIAL THANKS

We would like to thank our early supporters for their enthusiasm and encouragement since the beginning. The *Psychoanalytic Fair* would not have transformed from an idea to a reality without their consultation. We are truly indebted to: Annie Boland, Robin S. Brown, Frank Summers, and Joseph Wagenseller. Thank you to APA's Division 39 for donating a "golden ticket" to their Spring conference for a lucky attendee. Thank you to Katie Embręę and Bill Baldwin from the Teachers College Vice Provost's Office for providing instrumental support at every turn. The team at Teachers College Career Services deserves mention once more for their stellar assistance and clear vision! Their spirit of teamwork, optimism, and expertise in event planning was invaluable: Marianne Tramelli, Naomi Naizat, and Megha Sardana. Thank you to our dedicated students who volunteered their time and especially to Psi Chi and our MA Program team of ambassadors and advisors who were always available to take on any challenge: Mary Elizabeth Birearelli, Megha Sardana (again), Michael Levy, and Matthew Blanchard!
